

Environmental Education is a lifelong educational process that occurs at all levels of education.

location

The environmental centres are strategically positioned throughout Mpumalanga Province. Each centre is well-equipped to provide a unique environmental experience while increasing awareness and promoting sustainable practices to protect our natural resources for generations to come.

Several of the environmental centres provide overnight accommodation and arrangements for cooking facilities or meals can also be made.

awareness

education

Mpumalanga is renowned for its scenic beauty and rich biodiversity. Nevertheless, it is not immune to the consequences of natural resource degradation.

The Department of Economic Development, Environment and Tourism aims to develop an environmental knowledgeable society, actively involved in the fight against environmental challenges based on their environmental rights & responsibilities.

Waste clean-ups and tree planting activities conducive to a healthy and cleaner environment and programmes such as the Decade of Education for Sustainable Development and the Greenest Local Municipality Competition are done in close partnership with local government.

The Water Programme for pre-schools, the Climate Change Programme, Adopt-A-Schoolyard and Adopt-A-Spot Programmes are designed to involve schools and communities to take action in developing an environment sustainable for generations to come.

the 3 H's of Environmental Education

Action leads to a healthy environment and improved quality of life

A new generation of conservationists learn that they can care for our natural resources
